

RIDA ARSHAD

Final Year Student, Ballari Institute of Technology and Management (BITM)

(+91) 9955339479 | ridaarshad6577@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Ballari Institute of Technology and Management
B.E. in Computer Science and Engineering (Data Science)
CGPA: 9.66

2023 – 2027
Ballari, India

TECHNICAL SKILLS

Programming: Python, R, MySQL

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Seaborn, OpenCV, YOLOv8, Flask, Streamlit, MongoDB

Data Science Skills: Exploratory Data Analysis (EDA), Machine Learning, Data Visualization, Data Cleaning, Model Training & Evaluation

Tools: Jupyter Notebook, VS Code, PyCharm, Git, MS Excel

WORK EXPERIENCE

Intern – JSW Steel Ltd., Vijayanagar Works [🔗](#)

Nov 2025 – Jan 2026

Tech: Streamlit, Python, MongoDB, SQLite, MS Excel

- Built an interactive **NCO Quality Dashboard** with unit/product-wise filtering and financial-year analysis.
- Implemented weighted NCO% metrics with monthly trends, heatmaps, Pareto charts, and SPC monitoring.
- Automated data validation and reporting to support manufacturing quality audits.

PATENTS & PUBLICATIONS

Patent Application (Published):

An Automated Stereo Vision-Based Framework for Real-Time Pothole Detection, Severity Assessment, and Intelligent Route Optimization

Filed under Indian Patent Office (CGPDTM), Government of India — Application No: 202541114081 A

Dec 2025

Research Paper: [🔗](#)

PotBot: An AI-Powered Pothole Detection And Road-Damage Prioritization System

Publisher: IEEE

Apr 2026

PROJECTS

Banking Marketing Campaign Analysis

Feb 2025 – Apr 2025

Tech: Numpy, Pandas, Seaborn, Matplotlib

- Analysed 45k+ Portuguese bank dataset to identify term-deposit subscription drivers.
- Built 15+ visualizations and delivered insights for improving campaign targeting.
- Built feature-rich dashboards and performed segmentation and correlation analysis.
- Report: [Finlatics](#) | GitHub: [Finlatics](#)

PotBot – AI-Powered Pothole Detection

Apr 2025 – Present

Tech: YOLOv8, OpenCV, Numpy, Pandas

- Building YOLOv8-based pothole detection pipeline for dashcam footage.
- Logging GPS coordinates to prioritize high-traffic repair zones.
- Training custom models and generated real-time detection analytics.
- GitHub: [PotBot](#)

RailGuard — Dynamic Railway Traffic Simulation

Sept 2025 – Present

Tech: Flask, NetworkX, Threading

- Developing real-time rail traffic simulation using graph-based modeling.
- Implementing dynamic moving-block routing and multi-threaded scheduling.
- Improved network throughput and congestion management in high-density zones.
- GitHub: [RailGuard](#)

CERTIFICATIONS [🔗](#)

Gemini Certified Student(University) — Google for Education

Python for Data Science, AI and Development — IBM via Coursera

Internship Training in Python — ETZ Trainings

Data Analysis with R — Google via Coursera

Advanced Excel — Internshala

AWS Cloud Quest Practitioner — AWS Skill Builder

Data Science with Python — Finlatics Data Science Experience Program

ACHIEVEMENTS

Rank 1 in Department of CSE(Data Science) — First Year (2023–24)

Rank 2 in Department of CSE(Data Science) — Second Year (2024–25)

1st Place — Spark Tank (Ideathon)

1st Place — Debate Competition

Letter of Recommendation — Finlatics Data Science Experience Program [Refer](#)
