Professional Summary

A motivated and ambitious final-year Computer Science and Data Science engineering student with a passion for learning, problem-solving, and building practical solutions.

Skills

Databases MySQL, PostgreSQL, MongoDB	Frameworks & Libraries Spring Framework, Spring Boot, JMeter, JUnit, React, Node.js, Three.js	Programming Languages Java, Python, C++, JavaScript, HTML, CSS
Soft Skills Communication, Teamwork, Problem Solving, Time Management	Tools & Platforms IntelliJ IDEA, VS Code, Eclipse, Git, GitHub	

EDUCATION

2023 – 2027 Ballari	Bachelor of Engineering in Data Science Ballari Institute of Technology and Management CGPA : 9.3/10
2021 – 2023 Ballari	Pre-University Course (PUC) Sri Chaitanya PU College CGPA : 9.04/10

Projects

03/2026 – Present	Smart Ballari AI-Powered Integrated City Management & Citizen Engagement System - Developed a smart-city platform for civic issue reporting, emergency response, public transport, and municipal updates. - Integrated AI/ML, geospatial technologies, and Augmented Reality (AR) for issue classification, priority prediction, route optimization, and interactive city experiences. - Technologies/tools used : React, Node.js, MongoDB, Python, TensorFlow, Leaflet/Google Maps API
08/2025 – 12/2025	Digital Mental-Health & Support Platform Frontend Developer & Integration Support - Developed a multilingual mental health platform with AI chatbot, mood tracking, sleep monitoring, and counselling. - Designed a secure, user-friendly platform for mental health support. - Technologies / Tools Used : React.js, JavaScript, Node.js, Express.js, Firebase Auth, LowDB
08/2024 – 09/2024	Hotel Management System Lead Developer Developed a database-driven hotel management system to streamline room bookings, check-in/check-out, billing, and staff record management.

- Implemented normalized database design using SQL.
- Technologies / Tools Used : MySQL, DBMS Concepts

09/2024 – 10/2024

Personal Expense Tracker

- Developed a personal expense tracker for daily expense management.
- Implemented expense categorization and spending summaries.
- Technologies / Tools Used : Python, JavaScript, MySQL, MongoDB

07/2025 – 08/2025

Solar System Simulation

- Built a responsive 3D solar-system model with animated planetary orbits and real-time speed control.
- Technologies / Tools Used : HTML, CSS, JavaScript, Three.js

Awards & Achievements

Product Engineer (Incoming)

EdgeVerve Systems Ltd. (Infosys)

Currently undergoing pre-joining technical training.

Top 50 Finalist – National Entrepreneurship Challenge (NEC) 2023

Academic Excellence

Ranked 4th in the Department during First-Year Engineering.

Finance Coordinator

College intra-college fest

Certifications

- AWS Cloud Quest: Cloud Practitioner – AWS Skill Builder 
- Virtual Internship in Generative AI – SmartBridge & NASSCOM FutureSkills Prime
- Gemini Certified Student – Google for Education
- Internship Training in Python – EZ Trainings
